

„Child's Development and the Factor Stress“ 22. International Conference of Neurodevelopmental Delay in Children with Specific Learning Difficulties

Never before children in the industrial nations grow up in such safe and peaceful conditions - well accommodated and outfitted – with a right to healthiness and education.

But: In schools, nurseries and practices we see more and more children, who are highly stressed, full of anger and fear, worried, exhausted, irritable, bad modulated. Studies in Great Britain, Scotland and Ireland show a growing number of children, who are not physically ready to learn and achieve in school.

The 22. International Conference of Neurodevelopmental Delay in Children will deal with causes and ways out.

We invited the following international experts:

Prof. Dr.med. Joachim Bauer, Universitätsklinik Freiburg, D: „Basal neurobiological systems behind the psychological development of children: Motivation, stress, mirror neurons and aggression“

Sally Goddard Blythe MSc., Director of the Institute for Neurophysiological Psychology Chester, GB: „Neuromotor Immaturity in Children and Adults: Why we should not divorce the mind from the body“

Prof. Dr. Heinz Prechtel from Prof. Prechtel-Center, Graz, A: „The Prechtel-Syndrom“

Prof. Dr. Robert Barton from University Durham, GB: „Cerebellar involvement in brain evolution, development and behaviour“

Dr. med. Bruno Maggi, gynecologist, accoucheur und manualtherapist, Zürich, CH: „The influence of functional disorders of the upper cervical spine on the psychomotor functions of infants and school children“

Prof. Dr. Christa Einspieler from Medizinische Universität, Graz, A: „Does maternal stress affect fetal behavior? Or: The stressed fetus – facts and myths“

Katrin Sanne, Logopädin und Kinderpsychotherapeutin aus Schönberg, D: „Tinnitus bei Kindern und Jugendlichen“

Prof. Dr. med. Walter Lichtensteiger, Co-Director of the Group for Reproductive, Endocrine and Environmental Toxicology, Zürich, CH: „Hormonal active chemicals, brain development and behaviour: What do we know actually?“

Mag. Dr. Damir Lovric from University Innsbruck, A: „The effect of stress in mind, brain and body“

Judith Höferlin, Physiotherapist and Manualtherapist from Basel, CH: „Cranio-cervical dysfunction and its influence on the autonomic nervous system and the Moro reflex“

Enquired are:

Sarah Blaffer Hrdy, USA, Marina Marcovich, Vienna, Austria, Kerstin Uvnäs-Moberg, Stockholm, Sweden

The lectures will be given in German/English with simultaneous translation.
