Body to Brain Learning Professional Series:

(1) How the Body Tells the Learning Story: *Cracking the body language code that tells you how the brain and body work together to support learning.*

- Introductory course to this neuro-developmental approach to learning.
- Primarily for Educators who want to know more about this foundational aspect of learning, but also applies to others interested in this area of work (Allied Health Practitioners, School Psychologists, Gymparoo Franchisees, Family Day Care Providers, University students studying Education, Health, Allied Health professions, Child development, Social Work etc...)
- On-line. Live. Over 6 weeks of one hour information sessions with optional 45minute Q & A sessions each week. Checklists and other support materials are also provided. (Access to recordings will be made available to participants for limited times.)
- Delivered twice a year (at this stage). Opening for round 1 registrations in February.
- \$397 per person.

Body to Brain Learning
Professional Learning Series

(2) Reflexes, Learning and Vision Therapy: *Primitive reflexes as foundations for vision development.*

Screening and practical ways to incorporate primitive reflex work into a VT practice.

- 3 modules.
- Includes a theoretical component (Module 1) & practical components (Modules 2 & 3).
- Mixed mode delivery: online and in person.
- Two presenters including an Behavioural Optometrist providing optometric clinical insights and gems.
- Delivery tentatively set for July 2021.

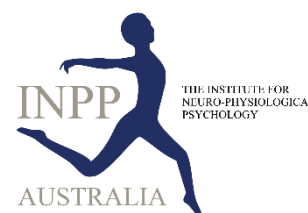

(3) The Body Learns First at School: *Assessing and supporting Neuro-motor & Sensory foundations of learning.*

- 3 module course delivered in mixed mode including: on-line, face-to-face group presentations AND ongoing mentoring and coaching with an INPP trained practitioner.
- Includes background information, practical assessment strategies and movement-based activities to be used in class.
- Evidence based practice/approach aligned with AITSL Standards and the Australian Curriculum.

This professional learning opportunity can be delivered to schools individually, clusters of schools, or for individual educators on the dates that will be advertised through the Integrating Thinking website, social media platforms and through the “Integrating Thinking Updates Email List.” (Register for updates: <https://integratingthinking.com.au/learn-more/>)

INPP Training:

Dr Christine Payard (PhD) is the licensed INPP Principal in Australia. She is licensed to deliver and supervise INPP activities within the Australian region. INPP courses offered by Integrating Thinking include:

(1) INPP Practitioner Training:

The official INPP Practitioner Training programme delivered internationally. Learn how to become an INPP Practitioner who assesses and addresses neuromotor and sensory immaturity in children and adults using the INPP Method^(R).

- 4 Modules:
 - Module 1: delivered online
 - Module 2: delivered face to face (when not restricted by COVID-19 regulations)
 - Module 3: delivered face to face (when not restricted by COVID-19 regulations for travel and in-person events)
 - Module 4: delivery mode negotiated with participants.
- Date for course delivery to be confirmed but probably beginning in October.
- Course details will be promoted through the “Integrating Thinking Updates Email List.” (Register for updates: <https://integratingthinking.com.au/learn-more/>) AND through social media platforms and on the website.

(2) INPP Health Care Practitioners Screening Course: One day programme for Health Care Practitioners.

Learn how to screen for Neuro-Motor Immaturity (NMI) using the INPP screening protocol in your practice. Screening for NMI takes about 10 minutes enabling you to identify possible NMI and refer to practitioners for further assessment and possible remedial activities.

- Delivered on demand depending on numbers
- On-line or face to face delivery.

(Register for updates: <https://integratingthinking.com.au/learn-more/>) AND through social media platforms and on the website.
